

DIRECT DEBIT, THE WAY FORWARD

Slow payers are the bane of a trainer's life and the NTF regularly has to help trainers negotiate settlement of out standing bills. However, we have been approached by Debit Finance Collections plc (DFC) with a view to offering a more comprehensive credit control service for members of the NTF at a very competitive rate.

DFC is a highly regarded Direct Debit Bureau. Their client list includes some of the most prestigious company names in the UK, including Traffic Master Plc, The Marston Group, and Newcastle City Council. We have checked several references on your behalf and are happy that they are a reputable and professional company.

The core skills of DFC are a professionally managed ledger control. Quite simply, they take away the headache of managing the monthly debtors. On agreeing a payment plan, either; weekly, fortnightly or monthly, with your owner you would obtain their bank details while you are on the phone to them or while they are with you. This information, the payment amounts, payment dates and length of payment period is then uploaded on a daily/weekly basis through DFC's secure web site. The monies would be collected on your behalf and transferred direct into your account 5 working days after the collection date. This would put you in control of collection and not have to rely on the owner to send a cheque or set payments up. We would suggest you utilise this system at all times as a pre requisite of doing business with you and initially put all new owners onto this system.
